

Steps to be followed to during Study Course once the Study Configuration is completed.

PUBLIC HEALTH FOUNDATION OF INDIA

CRDR-User Manual

Step 01: Study is published to Stage/Production after Configuration is completed.

Step 02: Study link is available with the PI team.

Step 03: Login in to "crdr.phfi.org" as PI and Request for required role and Required role and Required users. PI can request for roles and User for his study using "Request for Role" and "Request for User" options under "Admin tasks" module.

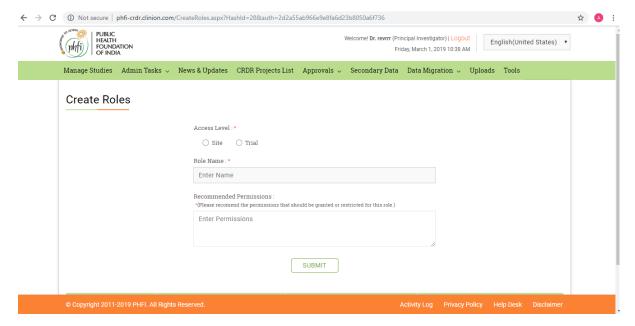

Request for Role

Using this menu PI user can Request any recommended roles to be added to the study. Both Site level as well as trail level users can be added. The request for addition of roles shall be sent to super admin user for approval.

The request can be raised using

- Access Level: A radio button selection to select "Site" or "Trail" level users.
- Role Name: Role recommended
- Recommended permissions: The required permissions for the role to be approved can be given here.

On clicking the Submit button, the Role request will be sent for Approval of the Super admin user. And the details are available in the table below. If user tries to enter the Role that already exists in system, system displays the message "Role Already Exists" up on submission.

CRDR-User Manual

Request for User

Request to create a user is initiated using this menu. Upon approval of Central Admin the user creation will be completed and username will be activated.

To create a user request, the following details need to be submitted

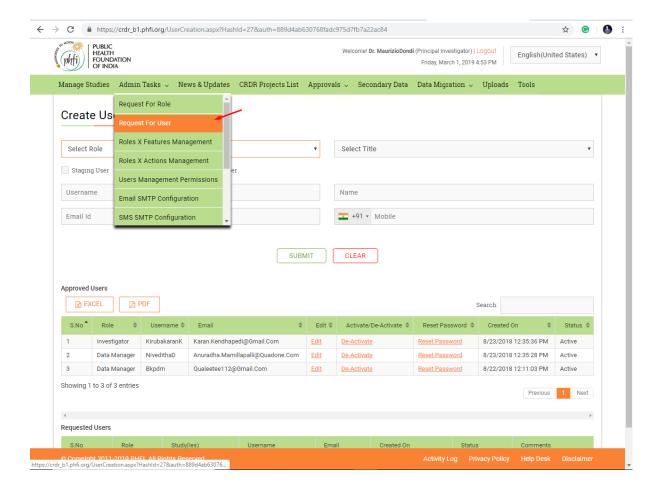

- I. Select Role: Drop down to select the required role name.
- II. Select Title: drop down menu to select the desired title for the user.
- III. Username
- IV. Name
- V. Email Id
- VI. Mobile number

The later part of page contains two table grids Approved Users and Requested Users.

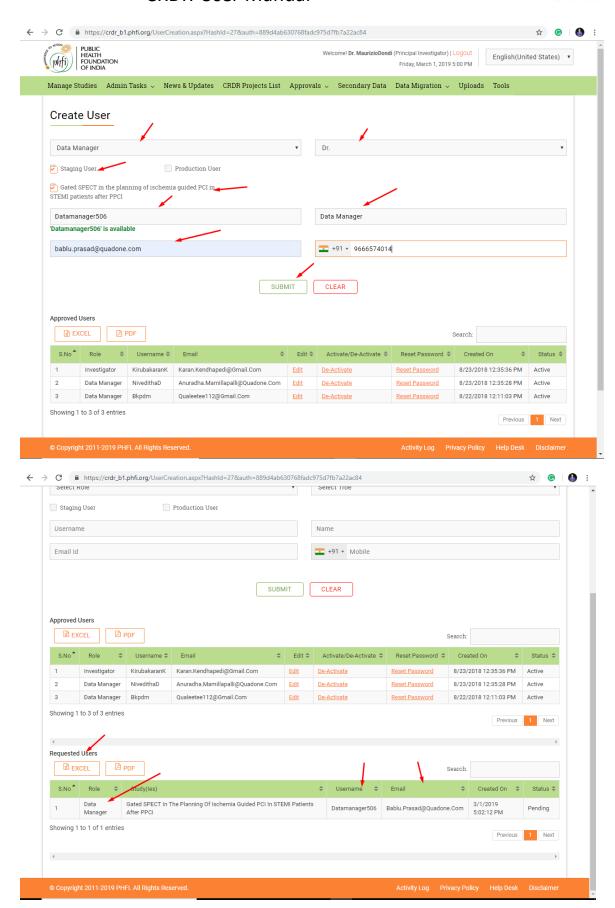

Approved Users: The user creation requests for which Central Admin approval is completed will be listed here.

Requested Users: The user creation requests for which the Central Admin is still pending will be listed here.

Reference:

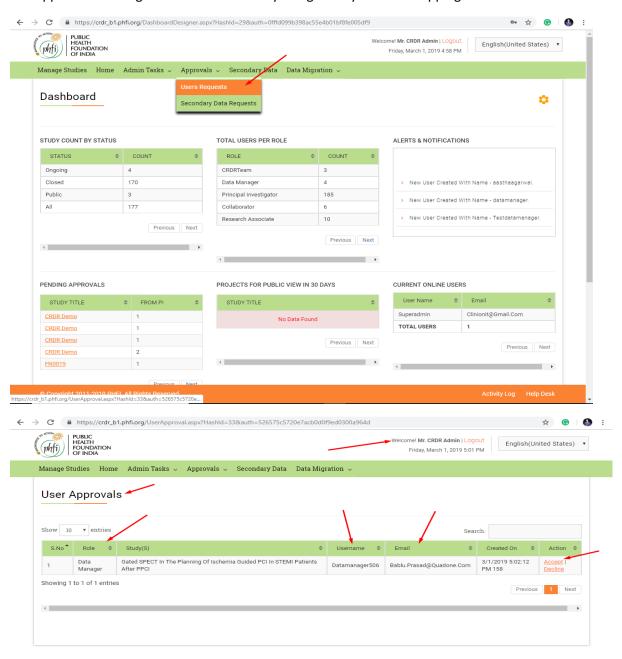

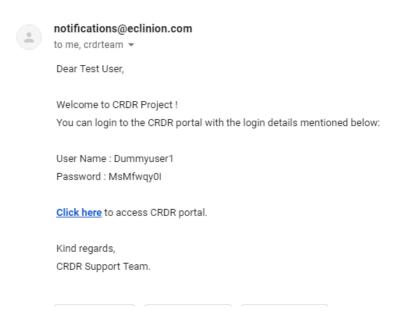

Step 04: An email notification shall be sent to the Super admin for the approval. Super admin user will Approve and assign the user to the Study using Study X Users Mapping.

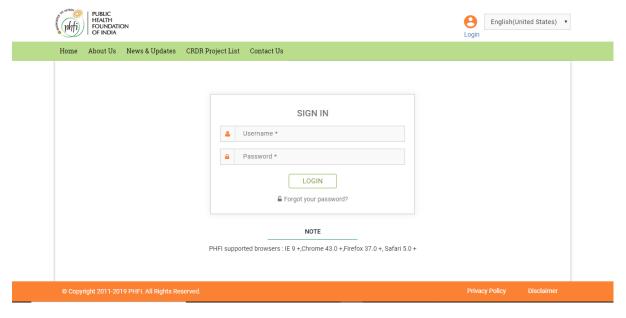

Step 05: Upon approval an email notification with User name and Temporary Password details shall be sent to users.

User Creation Details with CRDR Inbox x

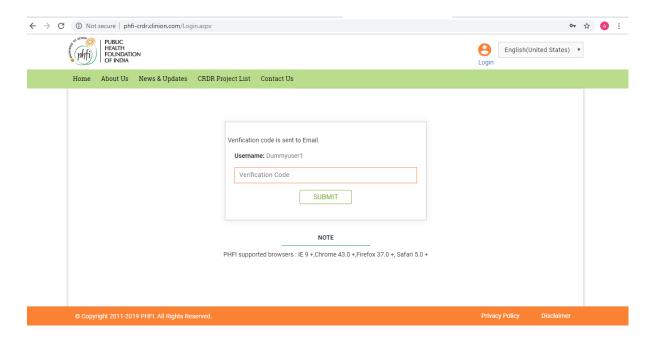

Step 06: User shall login using "crdr.phfi.org" with the given Username and Password details.

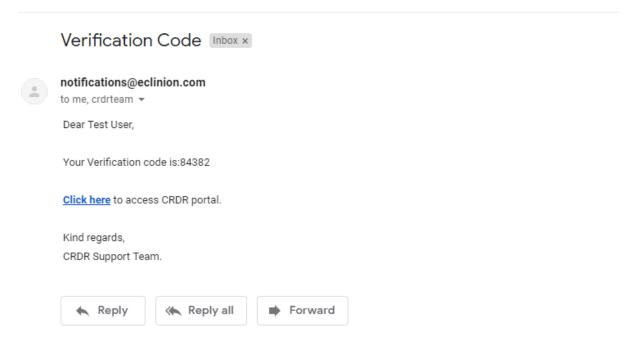

On logging in system will pop up a message to enter the verification code. User shall receive the verification code on the registered email id.

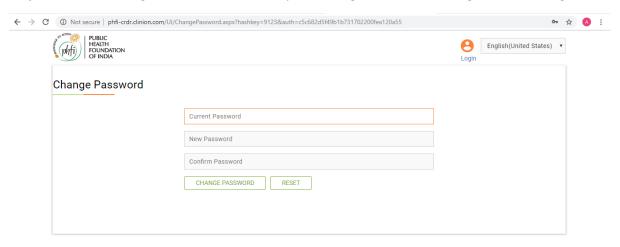

An email notification shall be sent to user on the registered email id.

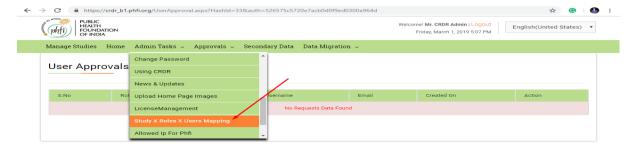

Step 07: On submitting the verification code, system navigates user to "Change Password Page".

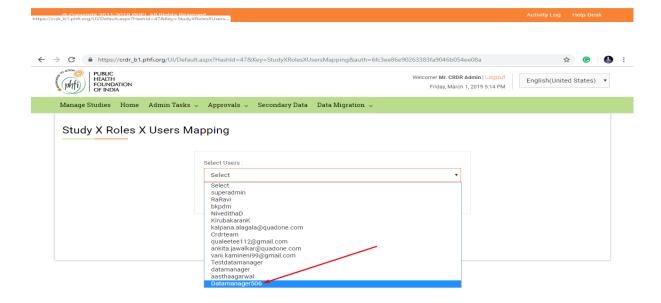

User needs to enter the Current password (password received through email) and desired password at New password and Confirm password sections. On resetting the Password the user logs in to the CRDR system.

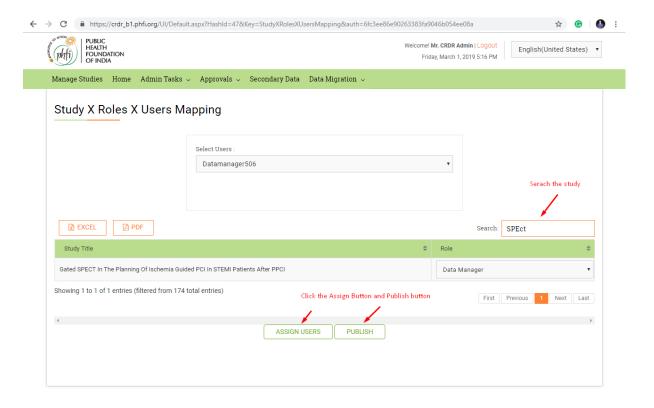

Step 08:- Now login with Superadmin with valid credentials and navigate to the **Admin Task** header menu and select the '**Study X Roles X Users Mapping**' submenu, Select the created user from user drop down and then click the **Assign Users** button and then **Publish** button.
